

About Us

Aspect Imaging is committed to making information only available from MR accessible where it is most valuable—in research and clinical applications. Whether your focus is research in areas such as pharmaceutical development, oncology treatment or medical advancement, or you are leading the care of the smallest premature baby, our solutions provide the information you demand. The information provided by MR is critical to your work and having it available without obstacles and without compromising your requirement for quality images elevates your work and impacts its outcome.

As the world leader in the design and development of compact MR imaging systems, our breakthrough technology in compact, high-performance, permanent magnets, offers disruptive MR solutions designed to address unmet needs in research and medical applications, providing the highest quality images possible for the benchtop or at the point-of-care.
